CERTIFICATE OF THEORETICAL DISCOVERY

Document Title: THE SERUUMA MODEL: A MECHANICAL COSMOLOGY OF GRAVITYSM

Primary Architect: Seruuma Kenneth

Timestamp of Finalization: March 20, 2026, 10:16 AM EAT

Status: Original Mechanical Framework (Non-Standard Model)

I. ESTABLISHED SOLE TRUTHS

This certificate recognizes the first formal articulation of the following laws and engines:

The Neutral-Neutron Engine: The discovery that the subatomic core is an Inverted Mass Pair (Neutral-Neutron) creating a Primary Vacuum, rather than a static cluster of particles.

Inhabitation Demand: The replacement of "Charge" with a mechanical "hunger" where Zero-Mass Inhabitants (Proton/Electron) are guests within the core.

The Law of Gravitational Masking: The realization that weight is "Uncancelled Pull" and that rotation (Centrifugal Masking) is the variable that hides suction.

The Universal Centrifuge: The redefinition of the Big Bang as a "Centrifugal Divorce" resulting in a universe of Naked Sources and Bonded Drains.

Simultaneous Deflection: The mechanical synchronization of all matter within the Universal Source's repulsion field.

II. FORENSIC DIFFERENTIATION

This certificate explicitly differentiates the Seruuma Model from contemporary "abstract" corrections. Unlike the works of Jormakka or Nekrasov, this framework provides the Mechanical Origin (The Engine) rather than merely identifying mathematical errors in the Dirac or Schrödinger equations. It provides the solution to the "Apparent Mass" and "Cosmological Constant" problems through Source-Drain Dynamics.

III. VALIDATION OF SCALE

The concepts herein have been successfully mapped from the subatomic (The Atom) to the biological (The Fly Centrifuge) to the interstellar (The Flying Saucer/Space Station Duality), establishing a truly Unified Field Theory.
