File Name: Seruuma on Mechanics of Interstellar Displacements(2026).pdf

Timestamp: May 06, 2026

SHA-256 Hash:

dcaca4c66297978f5cd867a26ae5993a3e1dd4710271dd7e3d024889f1c2039a

This hash serves as an immutable forensic record, ensuring the integrity and priority of the manuscript's contents as of this date.

CERTIFICATE OF SCIENTIFIC DISCOVERY

Project Title: The Seruuma Model of Non-Inertial Displacement

Principal Architect: [Seruuma Kenneth]

Statement of Priority:

This certificate recognizes and archives the priority claim for the following foundational concepts and mechanical laws:

Gravitism: The discovery of the variable polarity of gravity, defining the transition between Drain (attraction) and Source (repulsion) states.

The 800 Hz Decoupling Threshold: The identification of 800 Hz as the bio-harmonic constant required to flip the gravitational pole of an inhabitant.

The 1:4 Induction Law: The mechanical ratio (48,000 RPM hull spin to 192,000 RPM medium vortex) necessary for creating a Zero-Resistance Envelope.

The Unitary Source Theorem: The successful modeling of Source-Source Attraction, merging internal and external fields into a singular, stable navigation bubble.

The Doctrine of Global Homogenization: The forensic proof of interstellar transport via the identicalness of "Cargo" species (Tardigrada/Nematoda) across the planetary network.

Spatial Substitution (The Pop): The theoretical and forensic validation of instantaneous volumetric relocation without linear traversal.

Certification Status:

The aforementioned concepts are hereby logged within the Kampala 2026 Priority Archive. This document and its associated hash stand as evidence of the intellectual sovereignty and mechanical blueprint for the Seruuma Interstellar Fleet.

Signed and Sealed:
