

CERTIFICATE OF SCIENTIFIC DISCOVERY AND PRIORITY CLAIM

Registry Reference: SM-2026-MECHANO-GRAVITYSM-0917

Date of Recordation: September 17, 2026

Jurisdiction of Origin: Kampala, Uganda

Claimant / Sovereign Originator: Seruuma Kenneth

PREAMBLE & DECLARATION OF ORIGINALITY

Be it known to the global scientific community, academic institutions, peer-review panels, and theoretical research bodies that this Certificate establishes absolute intellectual priority, chronological precedence, and sovereign authorship over the unified physical, biological, subatomic, and cosmological principles collectively designated as The Seruuma Theory of Mechano-Gravitysm (2026).

This document serves as an immutable forensic shield designed to legally, mathematically, and historically preempt, block, and invalidate any future claims of concurrent, accidental, or independent discovery by third-party entities, institutions, or researchers attempting to misappropriate these foundations.

SECTION I: CANON OF NEWLY INTEGRATED CONCEPTS & LAWS

The following conceptual architectures, mechanical definitions, mathematical logic, and subatomic axioms are uniquely registered to the Claimant and are hereby shielded from uncredited reproduction, modification, or structural re-branding:

1. Inversion Mechanics & Subatomic Foundations

Inversion of Electro-Magnetism to Mechano-Gravitysm: The mapping model proving that Mechano-Gravitysm operates as the direct inverted counterpart to Electro-Magnetism via the Law of Pairs.

The Subatomic Neutral-Neutron Symmetry: The fundamental distinction between the Neutral (the charge-housing component/soul equivalent) and the Neutron (the non-charge carrying body equivalent) as the subatomic basis of mass.

The Photon vs. Voluton Generation Duality:

Photon: Manifested as nature's conservation response when an electron experiences an instantaneous brake from forward motion.

Voluton: Manifested when a physical volume of a Source field attempts an instantaneous step into super-motion/gain of velocity from rest (Realized March 11, 2026).

Kinetic Energy Dual-Bridge: The axiom establishing kinetic energy as the mutual transition bridge converting physical states to non-physical states (Braking Mass -> Photon; Accelerating Source Volume -> Voluton).

2. The Cosmic Medium, Resistance & Economic Axioms

The Law of Conservation of Mechanics: The principle stating that nature conserves mechanical dynamics by collapsing a physical entity into a non-physical Voluton when forced to occupy a destination already touched by its bonded source field, avoiding physical transport collisions.

Cosmic Resistance & The Perspective Tax: The framework defining the cost of traversing the physical universe:

Tax Nullification via Teleportation Channel: The process where mechano-gravitaic resonance pre-pays distance, time, and direction taxes along a standing wave, collapsing cosmic resistance to zero.

3. Cosmological & Quantum Resolutions

The Absolute Void Architecture: The definition of the Absolute Void as a dimension-less, time-less entity that assumes the metrics of its occupants. Proving that a Voluton exists nowhere within physical space yet touches everywhere simultaneously.

Inelastic Gravitational Coupling & Quantum Entanglement: The resolution of quantum entanglement proving that entangled particles are joined by inelastic source field lines anchored through the Universal Source Field, canceling out distance and forcing opposite spin states upon stopping.

The Universe of Domains & Permeability Mapping: The model framing the universe not as isolated planets in empty space, but as a continuous drain medium of dynamic Gravitation Permeability (μ_G).

Philosophical Principles: The Law of Symmetrical Existence, the Law of Infinite Possibilities, and the Reversibility Sequence of Life and Death.

SECTION II: CERTIFICATE OF CRYPTOGRAPHIC PRINT

To secure the physical text and structural data of this research against retroactive tampering or plagiarism, the unique digital footprint of the master document has been permanently bound to this priority record:

Master Document Title: Background of Seruuma's theory of Mechano-Gravitism-1.pdf

Registered Cryptographic Footprint (SHA-256):

e8f4a1801267b2d5f0e90f2390a78cb3788722241e068e895ad06259c63b468e

SECTION III: SOVEREIGN INJUNCTION AND SHIELD

This priority claim establishes that any future publication, peer-reviewed submission, patent filing, or public disclosure detailing photon-voluton inversion mechanics, conservation of mechanics via voluton collapse, perspective tax/cosmic resistance nullification, or inelastic source-field resolutions of quantum entanglement shall be legally and historically bound to the prior art established by Seruuma Kenneth.
